Gustavo Anverze de Souza

DevOps & Cloud Engineer | AWS | Docker | Kubernetes | Terraform |
Linux | CI/CD | Python | Workflow Automation with n8n
Joinville, Santa Catarina, Brazil

Summary

Technology professional with over 9 years of experience, with a
background ranging from technical support in corporate systems
to web development and process automation, always focused on
efficiency and scalability.

Currently making a strategic transition into Cloud/DevOps,
deepening my knowledge in technologies like AWS, Docker,
Kubernetes, Terraform, Linux, CI/CD, and Python, aiming to build
robust, scalable, and automated environments.

Throughout my career, I've worked extensively on process
automation, using n8n and Python to create smart integrations
between APIs and internal systems, streamlining operations and
increasing team productivity. In web projects, I've led migrations from
WordPress to React/Next.js, with a strong focus on performance,
SEO, and user experience.

My skill set combines product vision, software engineering, and
DevOps culture. I aim to align technical solutions with business goals
through analytical thinking, creativity, and a results-driven mindset.

Tech Stack: AWS, Docker, Kubernetes, Terraform, Linux, Git, CI/CD,
Python, n8n, React, Next.js
Soft Skills: Proactiveness, adaptability, teamwork, logical thinking,
delivery focus, and clear communication

I'm open to new connections and opportunities in Cloud Engineering
or DevOps, where I can contribute to secure, agile, and automated
environments.

―――

Experience

Pixel Perfect
Full Stack Developer
October 2022 - Present (2 years 10 months)
Joinville, Santa Catarina, Brasil

- Led the migration of the company's internal website front-end from WordPress/Elementor to a modern stack using React and Next.js, while maintaining WordPress as a CMS via API integration.

- Improved site performance, reducing homepage load time by 2 seconds.

- Developed reusable and modular components in React, enabling scalability and maintainability.

- Collaborated with design and marketing teams to ensure visual consistency and enhance user experience.

- Deployed blog environments using Docker containers hosted on AWS EC2 and S3, which sparked my deeper interest in cloud infrastructure and DevOps practices.

- Created scripts to automate simple deployment and local development tasks.

- Proactively monitored and maintained site performance post-migration.

- Documented technical processes and updates to support team knowledge sharing.

Key tools & tech: React, Next.js, WordPress (Headless), Docker, AWS (EC2, S3), REST APIs, Git
Skills: Front-end Development, Web Performance, Containerization, Cloud Hosting, API Integration

Self-Employed
Automation Analyst
November 2020 - Present (4 years 9 months)
- Designed and implemented custom automation workflows for data collection and analysis using n8n and Python.

- Integrated APIs like Facebook Ads and Google Sheets to extract and process real-time data for dashboards and custom platforms (e.g., Streamlit).

- Deployed n8n and Python services in Docker containers, hosted on lightweight AWS Lightsail instances to ensure scalability and reliability at low cost.

- Continuously optimized workflows for better performance, error handling, and maintenance.

- Identified automation opportunities in clients' manual processes, reducing human error and improving operational efficiency.

- Provided technical support for workflow issues and API integrations.

- Thoroughly documented all workflows, integrations, and system configurations to ensure transparency and scalability.

Key tools & tech: Python, n8n, Docker, AWS Lightsail, Linux, REST APIs, Google Sheets API, Streamlit
Skills: Workflow Automation, API Integration, Containerized Deployments, Cloud Hosting, Data Handling

Unimed Federação Santa Catarina
Systems Analyst
April 2018 - August 2020 (2 years 5 months)
Joinville, SC, Brazil

- Provided support for the TOTVS Protheus ERP, ensuring uptime, performance, and data integrity.

- Analyzed and proposed technical improvements to legacy systems, including requirement gathering, effort estimation, and documentation.

- Diagnosed and resolved issues in production systems to minimize downtime.

- Supported internal process automation through scripting and simple tool integrations.

- Worked cross-functionally with business units to align system enhancements with organizational needs.

- Assisted with infrastructure tasks such as log analysis and system performance testing.

Key tools & tech: TOTVS Protheus ERP, SQL, Shell Script, Log Analysis
Skills: System Support, Requirement Analysis, Legacy System Optimization, Cross-functional Collaboration

Selbetti
Full Stack Developer
October 2017 - April 2018 (7 months)
Joinville, SC, Brazil

- Developed and maintained internal applications in C# and JavaScript, focusing on system modernization and usability.

- Provided technical support for TOTVS Protheus ERP, handling issue diagnosis and resolution in production environments.

- Gathered business requirements and implemented improvements to software platforms.

- Documented processes and technical changes for long-term maintainability.

- Worked closely with business and IT teams to ensure alignment of software solutions with strategic goals.

Key tools & tech: C#, JavaScript, Protheus ERP, SQL Server, Git
Skills: Full Stack Development, System Maintenance, Support Operations, Technical Documentation

TOTVS
Support Analyst
October 2015 - October 2017 (2 years 1 month)
Joinville, SC, Brazil

- Provided multi-channel support (phone, ticketing system, in-person) for the Datasul ERP, focused on financial modules (AP, AR, Treasury).

- Performed log analysis and bug resolution in production environments to ensure business continuity.

- Documented incidents, resolutions, and technical procedures for internal knowledge base.

- Collaborated with internal development and QA teams to adjust system functionality and improve user experience.

- Conducted user training sessions, promoting autonomy and reducing recurring support issues.

Key tools & tech: Datasul ERP, SQL, Log Monitoring Tools, Internal Documentation Systems
Skills: ERP Support, Incident Management, Root Cause Analysis, Internal Training

ContaAzul
Full Stack Developer
February 2015 - August 2015 (7 months)
Joinville, SC, Brazil

- Supported development of new features and enhancements in Java-based systems.

- Wrote and maintained unit and integration tests to ensure code quality.

- Fixed bugs in both front-end and back-end components.

- Participated in agile development practices, including sprint planning and peer code reviews.

- Contributed to technical documentation and version control best practices.

Key tools & tech: Java, HTML, CSS, JavaScript, JUnit, Git, Scrum
Skills: Full Stack Development, Testing, Agile Collaboration, Code Quality

Home Cell – Mobile and Tablet Service Center
Sales Supervisor
November 2011 - June 2014 (2 years 8 months)
Joinville, SC, Brazil

- Managed the daily operations of the sales team, including goal setting, performance monitoring, and staff training.

- Handled inventory control, customer service, and sales reporting to ensure smooth store operations.

- Participated in recruitment and onboarding processes for new team members.

- In addition to management duties, I also handled minor IT tasks such as fixing internal network issues and troubleshooting the internal ticketing system, as there was no dedicated IT team — an experience that sparked my early interest in technology.

Skills developed: Leadership, multitasking, problem-solving, customer service, technical autonomy

TIM Brazil
Sales Consultant
March 2011 - September 2011 (7 months)

Responsible for receiving, checking, and organizing inventory, ensuring proper storage and reporting discrepancies.

Balaroti Building Materials
Stock Checker
June 2009 - December 2010 (1 year 7 months)

Responsible for receiving, checking, and organizing inventory, ensuring proper storage and reporting discrepancies.
